

RenBio Reimagines Antibody Therapeutics With Help from the Labstep ELN from STARLIMS

CHALLENGES

- ▶ RenBio's growth necessitated a centralized, uniform solution for capturing and analyzing research and experiment data.
- ▶ RenBio's research teams hoped to accelerate research outcomes by collaborating across teams.
- ▶ RenBio sought a system to help them store, retrieve, and provide seamless access to legacy experiment and research data.
- ▶ The company needed a singular, interconnected system that could be used company-wide, from the lab to the boardroom.

SOLUTIONS

- ➔ The Labstep ELN provided a cloud-based solution that securely centralized all research data and made it accessible by authorized members, empowering teams to collaborate.
- ➔ The Labstep ELN enabled interconnectivity to external software and instruments for in-depth analysis.
- ➔ The modern, intuitive solution enabled quick onboarding and was seamlessly implemented across the entire organization.

"All our data is now entered in Labstep and is easy to find. It's much easier than hard copy lab notebooks because everyone can access the data from their own computer."

Rachel Liberatore

President & Chief Scientific Officer

RESULTS

- ✓ Centralized, secure research data storage and retrieval
- ✓ Experiment data capture, now automated and standardized
- ✓ Single point-of-collaboration for research teams
- ✓ Enabled cohesive and linked processes across the lab
- ✓ Experiments now secure, accessible, and traceable
